

# CABLE TIES & ACCESSORIES

ELEMATIC®  
CABLING SYSTEMS

# ...max capacity!

Elematic Cabling Systems, with a production of cable ties all the year, 24 hours a day, 7 days a week is one of the worldwide top producers of polyamide cable ties.

A certified system (ISO 9001:2008), conformed to European Standards, guarantees the application of severe quality parameters on all stages, from the design to the production and after-sales service.

# CABLE TIES & ACCESSORIES

## How to choose the right cable tie

The most important characteristics of a cable tie are:

- the raw-material they are made of (weather, chemicals and heat resistance)
- the tensile strength they can stand (tear strength)
- the min and max diameter they can bundle
- the shape of the tie in case of particular applications
- the flammability rating

Hereby a few suggestions on how to choose the right cable tie for your application.

## Resistance to chemical agents

Chemical agents as powders, liquids or gases can deteriorate the raw material cable tie are made of, or extract some components from the plastic compound. The mechanical properties of the cable tie can deteriorate as a consequence of the interaction with several compounds. In this case the performance of the product could not meet the required standards.

## UV and weather resistant cable ties

All polymers including the polyamides used for the production of cable ties are sensitive to UV radiation.

The most common additive used for protecting polyamides from UV radiation is carbon powder commonly known as "carbon black".

**Natural Cable Ties (Elematic codes 52xx)** have low resistance to UV radiation and therefore are not suggested for outdoor applications.

**Black Cable Ties (Elematic codes 53xx)** are additized with carbon black. They have improved weather and UV radiation resistance and are better suitable for outdoor applications, but this is not enough to protect the material from the damage due to the UV-radiation for a long time. For these needs the weather resistance cable ties could be used.

Tests performed in should labs give for black cable ties a resistance till 150 hours QUV-B radiation following ISO 4892 norm. This can be compared to ca. 3 years outdoor resistance on average exposure to South-European areas.

We underline that particular environmental situations as combination of exposure to chemical agents and UV radiation, exposure to very warm, humid and sunny weather, etc., can change dramatically the performance of the product. Our indications should therefore be used only as a reference. In case of specific needs, please contact our technical department.

**Weather Resistant Cable Ties (Elematic codes 53xx UV)** are made of a specially additized compound to provide an extra weather resistance so that they are optional for outdoor applications.

Tests performed in recommended labs give for weather resistant cable ties a resistance till 600 hours of QUV-B radiation following ISO 4892 norm. This can be compared to ca. 10 years outdoor resistance on average exposure to South-European areas.

## Heat resistance and self-extinguishing cable ties

All polymers including also polyamides used for the production of cable ties are sensitive to high temperatures.

Exposure to high temperatures can break the chemical bonds of the polymer causing degradation and loss of mechanical resistance. Polyamide products can therefore become fragile and sensitive to vibrations.

The max suggested installation temperature for standard cable ties is 60°C, while the max service temperature for continuous use is 85°C.

**Heat Resistance Cable Ties (Elematic codes 53xx T)** are made of a specially additivated compound to provide an extra heat resistance (max service temperature for continuous use up to 125°C).

Polymers are also sensitive to low temperatures. Application of polyamide 6.6 cable ties is possible till around -10°C. Standard polyamide becomes very brittle at temperatures below -40°C (min. suggested service temperature for continuous use).

**Heavy-duty Cable Ties (Elematic "Belturing Plus" range)** provide an extra resistance to cold temperature (installation possible till -30°C) and an excellent resistance to UV radiation, therefore they are suggested also for external applications and long term exposure under the sunlight and UV action.

**Self-extinguishing cable ties (Elematic codes 52xx V0)** are made of polyamide 6.6 with additives that gives the auto extinguishing performance; the halogen and phosphorus free material avoids toxic emission in event of fire and conforms to UL-94 V0 and GW 960 °C standards.

## Tear resistance

The tear resistance is the most important parameter for choosing the right cable tie for a specific application.

The technical data sheets of Elematic cable ties give the minimum guaranteed tear resistance for all sizes.

Elematic cable ties are tested following the main international standards as EN 50146 and IEC 62275 using dedicated equipment and with a constant rate of 25 mm/min.

The strength causing the collapse of the cable tie is given in Newton (N).

**The standard testing conditions are 23°C and 50% of relative humidity.**

It is important to underline that the values arising from those laboratory tests may not be representative of the resistance to the loads of real installations, due to the presence of external factors (high humidity, vibrations, high temperatures, etc.).

We therefore suggest to apply a safety factor of at least 2. This safety factor should be chosen depending on the application conditions.

In case of severe working conditions, at high temperatures, high humidity, vibrations... this safety factor should be increased up to 5.

## General indications for cable ties installation (2,2-4,8 mm)

Cable Ties width (mm)	2,2	2,5÷2,6	3,6	4,5÷4,8
Tool setting (daN)*	0<daN<3	3<daN<6	6<daN<10	10<daN<13

\*1 daN ≈ 1kg

For more details concerning specific requirements, please ask our technical department.

## Flammability rating of Cable Ties

The UL 94 test (flammability of plastic materials for parts in devices and appliances) enables to compare plastic materials in terms of their burning behaviour. It gives indication either on the relative speed of burning, or on the ability to extinguish or not to propagate fire.

The classification starts with the lowest level HB till the highest V0 (best self-extinguishing value).

### HB (Horizontal Burning) - Test description

Sample size	125 ± 5 x 13 ± 0.5 mm
Thickness	0.8; 1.6; 3.2; 6 mm
	Bar having marked lines at 25 and 100 mm from its end
Pre-treatment	48 hours / 23 ± 2 °C / 50 ± 5% RH
Burner	Bunsen Ø 9.5 mm 100 mm length
Flame height	20 ± 1 mm
Contact time	30 s

The material is classified HB if the burn rate measured between the 2 marks, does not exceed:  
 38.1 mm/min for 3.2 mm testbar thickness;  
 63.5 mm/min for <3.2 mm testbar thickness;  
 In both cases the testbar should stop burning before reaching the 100 mm mark.

### V0-V1-V2 (Vertical Burning) - Test description

Sample size	125 ± 5 x 13 ± 0.5 mm
Thickness	0.8; 1.6; 3.2; 6 mm
Pre-treatment	One set of 5 testbar conditioned for 48 hours / 23 ± 2 °C / 50 ± 5% RH; One set of 5 testbar conditioned for 168 hours at 70 ± 1 °C
Burner	Bunsen Ø 9.5 mm 100 mm length
Flame height	20 ± 1 mm
Number of flame applications	2 x 10 s

A flame is applied 2 times on 5 testbars obtaining 10 values per set of testbars. Two sets of sample, differently conditioned are tested for a total of 20 values.

Classification	V0	V1	V2
Maximum burning time single specimen (s)	≤ 10	≤ 30	≤ 30
Maximum burning time total of 5 specimens (s)	≤ 50	≤ 250	≤ 250
Afterflame plus afterglow time for each individual specimen after the second flame application (s)	≤ 30	≤ 60	≤ 60
Afterflame or afterglow of any specimen up to the holding clamp	No	No	Yes
Cotton indicator ignited by flaming particles or drops	No	No	Yes

All standard Elemenatic polyamide 6.6 cable ties are made of UL 94-V2 classified raw material.  
 Coloured masterbatches are compliant to RoHS directive and are therefore prepared without Lead, Chrome or Cadmium, due to this reason colour can slightly change depending on moulding condition.

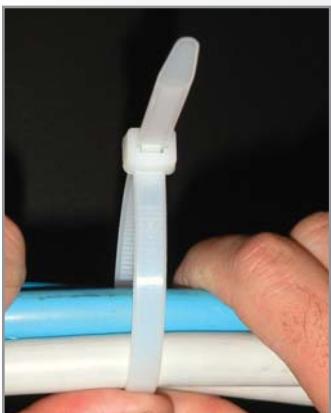

**Special Cable Ties (Elematic codes 52xx V0 are made of a specially additivated compound to provide an extra self-extinguishing power (UL 94-V0).**

Isooctane		G	Zinc oxide		G

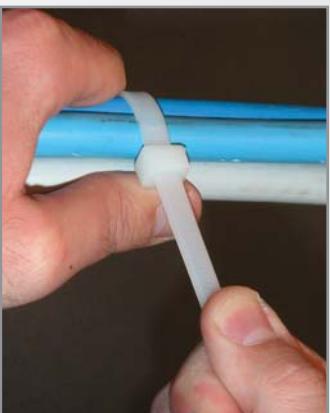

G= Good resistance without noticeable variations in weight and/or volume  
D= Discrete resistance with significant variations in weight and/or volume resulting from prolonged contact.

L= Limited resistance: It is possible to use the material in case of short contact.  
P= Poor resistance; the material is strongly attacked.  
S= Soluble

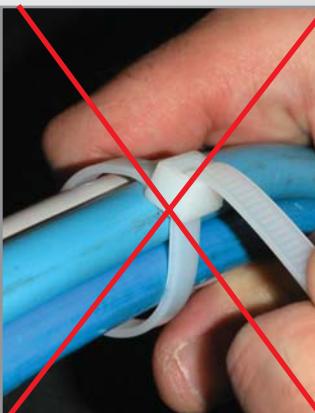

## MANUAL INSTALLATION OF STANDARD CABLE TIES

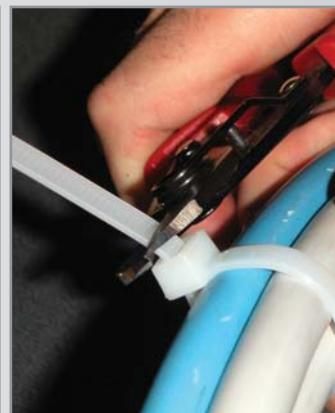

Insert the tip of the tie.

Tighten manually the tie till complete fixing of the cables.

Avoid sharp bending of the tie:  
it will not improve the fixing strength.

Cut the exceeding part of the tie,  
with a few mm of safety length.

## TOOL INSTALLATION OF STANDARD CABLE TIES

Set the max tension of the tool  
depending on the size of the tie.

Grip the tie with the tool.

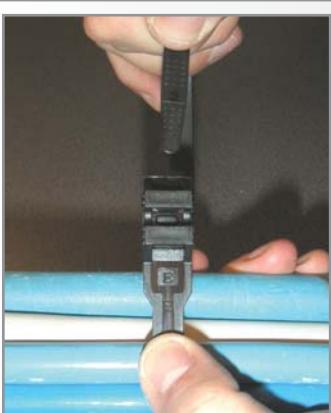

Tighten the tie till complete fixing  
of the cables.

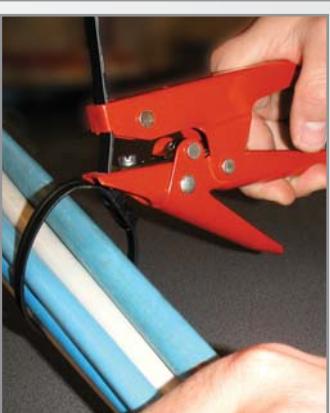

Cut the exceeding part  
of the tie.

## TOOL INSTALLATION OF BELTURING CABLE TIES

Insert the tip of the tie and tighten  
a short segment.

Use the tool for tightening the tie  
around the cables.

Tighten the tie till complete  
fixing of the cables.

Cut the exceeding part of the tie  
with the tool, leaving at least one  
centimeter of safety length.

## Quality System

### **ISO 9001:2008**

The company is certified ISO 9001:2008 for the design and manufacturing of cable ties and fixing systems with engineering polymers. Trading of fixing, cabling systems and electrical power tools. This certification guarantees that all the steps of our company processes, from development to delivery, are controlled following detailed procedures.

### **ISO 14001:2004**

The company has obtained ISO 14001:2004 certification for the activity: design and manufacturing of cable ties and fixing systems with engineering polymers through injection moulding process. Trading of fixing and cabling accessories.

## Voluntary product certifications through international approval societies

### **UL - File E86244**

Elematic Cable Ties are recognized by the Underwriters Laboratories Inc. following the norm UL 1565 "Wire positioning devices" for the continuous use at a max temperature of 85°C.

### **R.I.Na. Certificate ELE158207CS**

Italian Naval Register homologation following the norm IEC EN 60092-101 "Electrical installation in ship".

### **GL Germanisches Lloyd certificate Nr. 99 332 - 97 HH**

Certifies the mechanical properties and the flame resistance of the Elematic cable ties.

### **DNV - File E6996**

Guarantees that the Elematic cable ties comply the "Det Norske Veritas" standards for the securing of cables in the naval constructions and offshore, for indoor and outdoor installations.

### **LLOYD'S REGISTER - Type Approval Certificate N° 09/00025**

Certifies the mechanical properties and the flame resistance of Elematic cable ties in the shipbuilding and offshore applications.

### **BUREAU VERITAS - Certificate n° 13190/B1 BV**

This homologation, according to IEC 60092 – EN 50146 normative, assures that Elematic Cable Ties are made in accordance to "Bureau Veritas" standards for the fixing cables in shipbuilding.

## Self declarations

### **CE marking**

Elematic certifies the conformity of its cable ties to the European instruction 73/23/CEE and following modification 93/68/CEE.

### **CEI EN 50146 - CEI - IEC 62275**

Elematic cable ties are internally tested following the European Norm "Cable Ties for Electrical Installation". The results are in accordance with the requirements of the regulation.

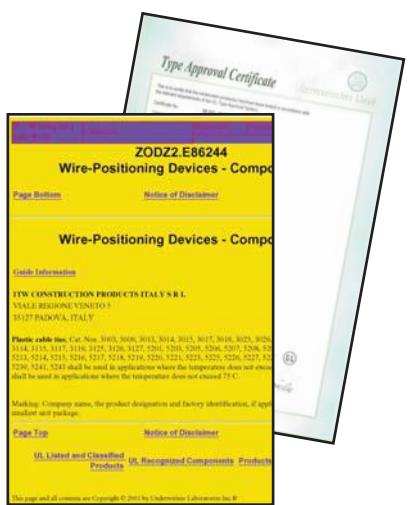

### **RoHS - WEEE - ELV**

Material used for Elematic cable ties & Accessories are compliant to European directives regarding:

- RoHS - restriction on hazardous substances (2002/95/CE),
- WEEE - waste of Electrical and Electronic Equipment (2002/96/CE),
- ELV - life vehicles (2000/53/CE).

### **REACH (2006/1907/CE)**

In our products there are no substances in the "Candidate list of authorization" published in October 2008 and updated on 13<sup>th</sup> January 2010.

# TECHNICAL PARAMETERS OF RAW MATERIALS

Material	Working temperature	Colour	UL-rating flame	Moisture absorption		Characteristics
				23°C 50% U.R.*	Saturation	
<b>Polyamide 6.6</b>	-40°C ÷ 85°C	natural / black	UL 94-V2	2,7%	8,5%	Polyamide 6.6 injection moulding grade. Good resistance to bases, oils, greases, fuel, oil derivates.
<b>Polyamide 6.6 Heat stabilized 6.6</b>	-40°C ÷ 125°C	natural / black	UL 94-V2	2,7%	8,5%	Polyamide 6.6 heat-stabilized for endurance applications to high temperatures.
<b>Polyamide 6.6 UV stabilized</b>	-40°C ÷ 105°C	black	UL 94-V2	2,7%	8,5%	Polyamide 6.6 UV for improved weather resistance.
<b>Polyamide 6.6 Self-extinguishing</b>	-40°C ÷ 85°C	natural	UL 94-V0	2,7%	8,5%	Self-extinguishing polyamide (halogen and phosphor-free).
<b>Belturing Plus</b>	-45°C ÷ 85°C	black	UL 94-HB	0,6%	1,2%	Good resistance to UV rays and weather. Improved shock resistance. Reduced moisture absorption.
<b>Polyethylene HD</b>	-40°C ÷ 100°C	white	UL 94-HB	-	-	High-density polyethylene. Good shock resistance.
<b>Polyethylene LD</b>	-50°C ÷ 90°C	natural/black white	UL 94-HB UL 94-V2	-	-	Low-density polyethylene. Good shock resistance.
<b>Polyamide 6</b>	-10°C ÷ 65°C	black	UL 94-HB	3,0%	9,5%	Polyamide 6 for moulding injection.
<b>Polypropylene</b>	-10°C ÷ 105°C	natural	UL 94-HB	-	-	Resistant to high temperatures, without any absorption of humidity. Good resistance to bases and weak acids.
<b>ABS</b>	-10°C ÷ 60°C	natural / black	UL 94-HB	0,3%	-	ABS injection moulding grade. Good shock resistance, good resistance to inorganic salts, bases, alcohols and hydrocarbides. Good heat resistance. Low moisture absorption.
<b>PVC</b>	-10°C ÷ 70°C	natural	UL 94-V0	-	-	Rigid PVC. Low resistance to organic compounds and solvents. Good aging resistance. No moisture absorption.
<b>Polycarbonate</b>	-5°C ÷ 85°C	transparent	ULV 94-V0	-	-	Low resistance to chemical agents and solvents. Good UV resistance.

\*R.H.=relative humidity

# STANDARD CABLE TIES

## Characteristics:

Material:	Polyamide 6.6
Humidity absorption:	2,7% (50% relative humidity)
• Working temperature	-40°C ÷ 85°C
• Tightening temperature	-10°C ÷ 60°C
• Max admissible point	+110°C for short time
• Melting temperature	+256°C
Limit Oxygen Index (LOI):	27%
Flammability rating:	UL 94 class V2.

Tested according to EN 50146

- High resistance to bases, oils, greases, oil derivatives.
- Limited resistance to acids.
- Not resistant to phenols and to chloride solvents.
- Halogen-free resins.
- UV resistance (black color).

## EC Directives:

The raw material used to produce our cable ties is compliant with EC Directives:

- 2000/53/EC (ELV)
- 2002/95/EC (RoHS)
- 2002/96/EC (WEEE)
- 2003/11/EC

## Applications

- Electrical installations.
- Industrial Wiring.
- Automotive.
- Panel building.
- Special applications.

## Characteristics

- Our Cable Ties are made exclusively of polyamide 6.6 so that they do not cause issues of material separation during recycling or interferences in electronic equipments.
- In the black cable ties the added carbon black gives an UV resistance according to ISO 4892 (QUV-B 150 hours), compared to 3 years of outdoor exposure under the sunlight and UV action.

## Benefits

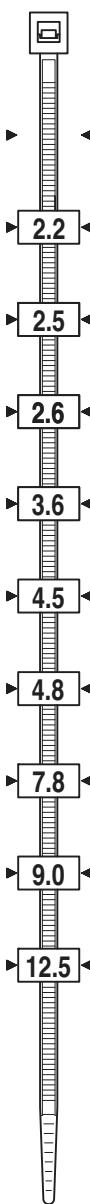

- Smooth rounded edges make them easier to be handled and safer to be installed.
- Bent rounded tip allows easier insertion through the head of the cable ties.
- Low friction coefficient of the material.

Tools for cable ties, see pages 120-121.

Our cable ties are constantly tested in our laboratories following important international standards. Particular extreme cable ties uses, weather conditions or even unsuitable applications might nevertheless vary some of the data we declare. Therefore, in case of specific enquiries or problems, do not hesitate to contact us. We will be pleased to share our experience with You.

**Polyamide 6.6 cable ties width 2,2 ÷ 12,5 mm**

## CABLE TIES ROTATING DISPLAY - (with fixed hooks)

Code display: **8312500**

Height: 76 cm - Width: 26 cm - Depth: 26 cm

This cable ties display can contain 7 different dimensions of cable ties (from cod. 5x01/CE up to 5x27E) for a max quantity of 5 cable ties bags for hook.

## CABLE TIES FLOOR DISPLAY - (with moving hooks)

Code display **8222200**

Height: 202 cm - Width: 54 cm - Depth: 36 cm

This cable ties floor display, with moving hooks, can contain 30 different dimensions of cable ties for a max quantity of 7 cable ties bags for hook.

### Composition of the cable ties floor display

Cable ties composition: **8222212**

# COLSPEED CABLE TIES

## Characteristics:

Material:	Polyamide 6.6
Humidity absorption:	2,7% (50% relative humidity)
• Working temperature	-40°C +85°C
• Tightening temperature	-10°C +60°C
• Max admissible point	+110°C for short time
• Melting temperature	+256°C
Limit Oxygen Index (LOI):	27%
Flammability rating:	UL 94 class V2.

Tested according to EN 50146 and EDF HN 33 S 62

- High resistance to bases, oils, greases, oil derivatives.
- Limited resistance to acids.
- Not resistant to phenols and to chloride solvents.
- Halogen-free resins.
- UV resistance.

## EC Directives:

The raw material used to produce these cable ties is compliant with EC Directives:

2000/53/EC (ELV)  
2002/95/EC (RoHS)  
2002/96/EC (WEEE)  
2003/11/EC

## Applications

- Electrical installations.
- Industrial Wiring.
- Automotive.
- Panel building.
- Special applications.
- External application.

## Characteristics

- The flat head, the high surface and the closing system with external teeth of these Cable Ties, make them particularly suitable for applications on suspended lines, avoiding problems of insulation damage.
- In the Colspeed cable ties the added carbon black gives an UV resistance according to ISO 4892 (QUV-B 150 hours), compared to 3 years of outdoor exposure under the sunlight and UV action.

## Benefits

- Ensure a permanent installation.
- Bent "tooth".
- Bent rounded tip for the safest application.
- Smooth rounded edges make them easier to be handled and installed.

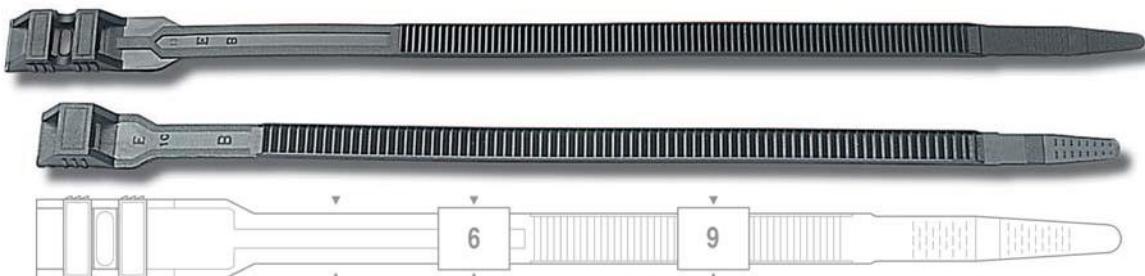

Tools for cable ties, see pages 120-121.

Code	Dimension (mm)	Head	Ø Bundle max (mm)	Tensile strength (kg)	Tensile strength (N)	Bag pcs	Cartoon pcs

6503E	8,8X380	TD	100	55,08	540	100	2.000

• TS = single head • TD = double head

# BELTURING PLUS CABLE TIES

## Characteristics:

Humidity absorption:	<1%
• Working temperature	da -45°C a +85°C
• Tightening temperature	da -30°C a +60°C
• Max admissible point	+120°C for short time

Limit Oxygen Index (LOI): 22% (EN ISO 4589-1 and ASTM D 2863-00)

Flammability rating: UL 94 class HB.

Halogen-free resins.

Tested according to EN 50146 and EDF HN 33 S 62

- High UV resistance.
- High resistance to bases, oils, greases, oil derivatives.
- Limited resistance to acids.
- Not resistant to phenols and to chloride solvents.
- Halogen-free resins.

## EC Directives:

The raw material used to produce these cable ties is compliant with EC Directives:

2000/53/EC (ELV)  
 2002/95/EC (RoHS)  
 2002/96/EC (WEEE)  
 2003/11/EC

## Applications

- Electrical installations.
- Industrial wiring.
- Automotive.
- Panel building.
- Special applications.
- Outdoor uses.

## Characteristics

The flat head, the high surface and the closing system with external teeth of these Cable Ties make them particularly suitable for applications on suspended lines, avoiding problems of insulation damage.

## Benefits

- Highly withstands climatic changes, also in sea-areas.
- High UV resistance.
- Halogen-free resins.

Tools for cable ties, see pages 121.

A very practical box that can easily be hung to your belt. Its convenient upper opening, very easy to be reclosed, allows the quickest picking-up of the product and the best protection from dust.

# Cable ties COLSTEEL

**Cable ties made in stainless steel 304 with ball lock system.**

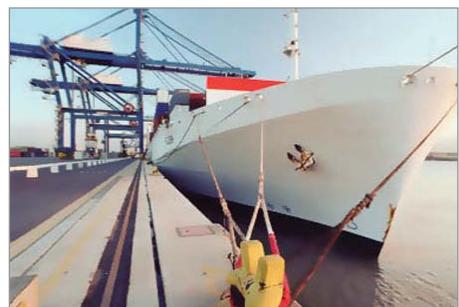

## Characteristics:

Material: Stainless steel 304  
Operating temperature: -80 °C ÷ 538 °C.

Uninflammable.

Resistance to external agents:

- Outstanding resistance to acid, oils, greases, chemicals, solvents.
- High resistance to the seawater and to corrosive atmosphere.
- Excellent resistance to UV rays.
- Stainless steel 316 on request.

## Applications

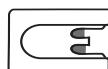

For heavy duty applications and where a great resistance to corrosion, high temperature, fire, chemicals and atmospheric agents are required. These cable ties are particularly used in shipbuilding, mining, oil rigs, food industry, theatre, cinemas and exhibition halls.

## Characteristics

- High resistance to corrosion.
- High tensile strength.
- No absorption of humidity.
- High resistance to very high temperature and flame.
- High resistance to atmospheric agents and UV rays.
- Outstanding chemical and corrosion resistance.

## Benefits

- The ball lock system allows a little effort and permit the closing adjust in continuous.
- It is possible to lock the cable ties by hand or with the dedicated tool (code 5407).
- The easy closing system allows to save time during the installation.
- They can be put like fire assurance when other plastic cable ties are used (i.e. in the ship technological plants).
- The absence of flashes and cutting edges avoid damages on the cable electrical insulation.

**Tool for cable ties**

Cod.	L (mm)	Weight (gr.)	Packaging pcs
5407	178	560	1

Tool for stainless steel cable ties with width up to 7,9 mm. Made in a strong metallic structure, it allows to adjust the tightening strength with the screw under the handle. When the set tension is reached, the blade cuts off the tail of the ties without effort and flashes.

# SPECIAL CABLE TIES

Cable ties available on request. Minimum order quantities are applied.

These cable ties, made of polyamide 6.6 with additives, can be used for operating temperatures up to 125°C / 145°C for short time.

Operating temperature: -40°C ÷ 125°C  
Flammability rating: UL-94 V2.

## HEAT RESISTANT cable ties (-40°C +125°C)

Code	Code	Dimension	Ø Bundle	Tensile strength	Bag	Carton	
Natural	Black	(mm)	max (mm)	(kg)	(N)	pcs	pcs
5203/C TE	5303/C TE	2,5x98	21	8,16	80	100	40.000
5209/C TE	5309/C TE	3,6x140	32	13,26	130	100	25.000

5227 TE	5327 TE	7,5x365	100	55,08	540	100	3.500

These cable ties are made with a special compound that assures an UV resistance according to ISO 4892 (QUV-B 600 hours), compared to 10 years of outdoor exposure under the sunlight and UV action.

Operating temperature: -40°C ÷ 105°C  
Flammability rating: UL-94 V2.

## UV AND WEATHER RESISTANT cable ties (UL 94 - V2) - for outdoor use

Code	Dimension	Ø Bundle	Tensile strength	Bag	Carton	
Black	(mm)	max (mm)	(kg)	(N)	pcs	pcs
5303/C UVE	2,5x98	21	8,16	80	100	40.000

5327 UVE	7,5x365	100	55,08	540	100	3.500

These cable ties, made of polyamide 6.6 with additives, can be used where the auto extinguishing performance is required. They conform with UL-94 VO and GW 960°C standards and the halogen and phosphorus free material avoids toxic emission in event of fire.

Operating temperature: -40°C ÷ 85°C  
Flammability rating: UL-94 VO.

## SELF-EXTINGUISHING cable ties (UL 94 - VO) - GW 960°C

Code	Dimension	Ø Bundle	Tensile strength	Bag	Carton

The nylon 6.6 releasable cable ties allow a quick and simple release of the ties. They are ideal for temporary installations or when the addition or removal of cables is required.

Operating temperature: -40°C ÷ 85°C  
Flammability rating: UL-94 V2.

The Polyamide 6.6 push mount cable ties are used for fixing cables to panels with thickness up to 3 mm.

Operating temperature: -40°C ÷ 85°C  
Flammability rating: UL-94 V2.

<b>104294</b>	D	59,9	49,9	100

\*IMPORTANT: these identification plates can be attached around a cable harness with cable ties up to 4,8 mm wide.

## MOUNTING BASES - SINGLE WAY

Applications	Characteristics	Benefits
--------------	-----------------	----------

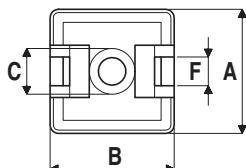

They are used with cable ties, for routing and securing wire bundles or cables. Their thin profile allows use in limited areas.

Operating temperature: -10°C ÷ 60°C

Flammability rating: UL 94-HB.

Material: ABS.  
(characteristics on page 19)  
Self adhesive bases with 2 different types of adhesive foam: rubber base, acrylic base.  
**The rubber base adhesives:** are particularly suitable for immediate applications.  
**The acrylic base adhesive:** is instead more suitable for long period applications and where a good UV ray resistance is required.

Easy to apply.  
Suitable for cable ties up to 4,8 mm width.

**mounting bases WITHOUT ADHESIVE (application with screw)**

### INSTALLATION INSTRUCTION FOR SELF ADHESIVE MOUNTING BASES

**1** Clean the surface using an appropriate cleaner (e.g. isopropanol/water) avoiding to leave any residues.

**2** Wait until the cleaned surface is completely dried.

**3** Peel off the protective film avoiding to touch the adhesive.

**4** Put the base on the cleaned surface, pressing down with the finger for several seconds.

**5** Wait for a certain time (minutes in case of synthetic rubber, hours in case of acrylicate) to assure the max adhesion to the surface.

# ELEFIX: PIPES FIXING SYSTEM

## Characteristics:

Material:  
Colours available:  
Sizes available:  
Width of the cable tie:

Polyamide 6.6  
Grey, black UV resistant, white self-extinguishing.  
 $\varnothing 16 \div 32$  mm;  $\varnothing 40 \div 63$  mm.  
7,5 mm.

Temperature:  
• Working temperature  
• Tightening temperature

-40°C  $\div$  85°C  
-15°C  $\div$  60°C

Threaded hole: M6/7 - 1,5 mm.

Flammability rating:  
UL 94 class V2 for grey and black ELEFIX.  
UL 94 VO for white ELEFIX.

Max tensile strength: 360 N.

## Applications

- ELEFIX is the practical and fast support for cables and pipes.
- It is available in three versions: the grey one is recommended for indoor applications, the black one, UV stabilized, is indicated for the maximum resistance against UV rays and atmosphere agents, and the white one is for applications needing glow wire 960°C resistance (public buildings, cinemas, theatres etc.).

## Characteristics

- The two versions 16-32 mm. and 40-63 mm. allow the fixing of all pipes with a maximum diameter of 63 mm.

## Benefits

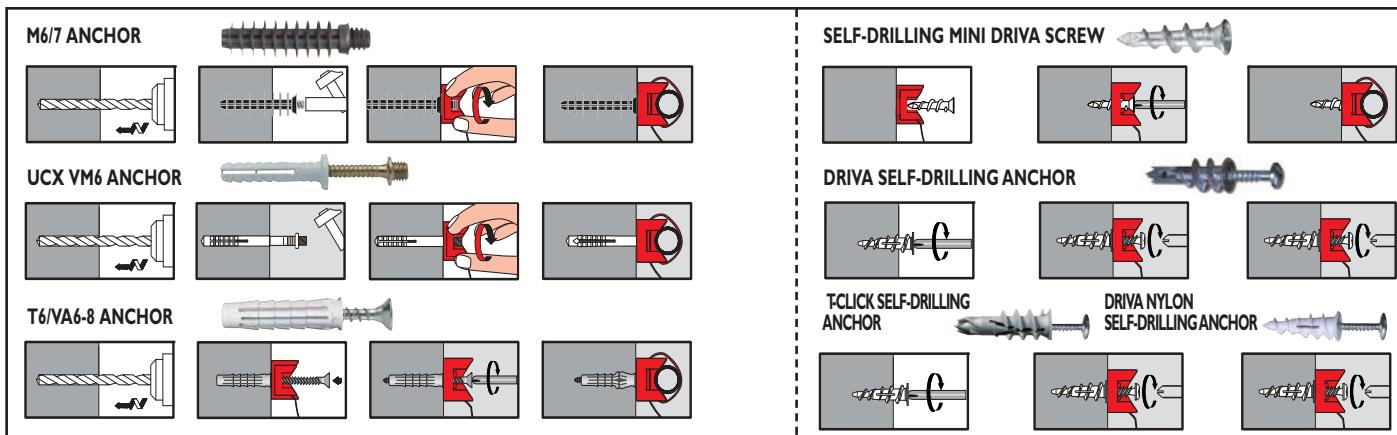

- **THE UNIVERSAL FIXING.** The ELEFIX range with its accessories is suitable to be fixed to any material such as natural stone, concrete, hollow brick, plasterboard, composite boards and aerated concrete. 
- **THE ORIGINAL PACKAGING IS FUNCTIONAL AND COMMUNICATIVE OFFERING TO THE INSTALLERS THE MAXIMUM COMFORT ON APPLICATION.** The box contains an empty space for placing the case with the fixing accessories which are more suitable for the wished application. Such solution allows a fast and simple replacement of the fixing products, helping and improving the job organization and efficiency.

# ECAV

## ECAV

**ECAV** is a **plastic clip** with an upper part suitable for pipes saddle measuring from Ø 4 to 60 mm.

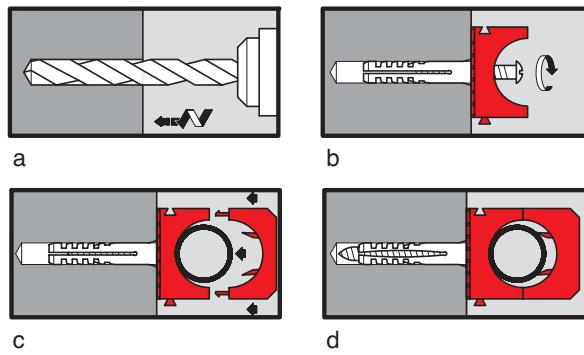

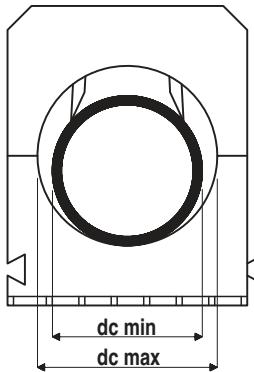

**ECAV** can be installed with a light-weight anchor.

The characteristics are:

- Made of polypropylene colour grey RAL 7035.
- Flammability rating: UL 94-HB.
- Simple interlocking of the upper part bypassure.
- The pressure of the inside flexible tabs fix the pipes in position, leaving room for longitudinal movements.
- A side hook for connecting other pipe saddles in series.

**ECAV** is available in many diameters and packagings (box or industrial carton).

Type	Code	Min pipe diameter dc/min	Max pipe diameter dc/max	Resistance of the top part opening daN	Box pcs	Carton pcs

# ECLIP

## ECLIP

**ECLIP** is a **plastic clip** for fixing or protecting rigid, metric insulating pipes in electrical installations, on vertical or horizontal surfaces (from Ø 16 to 50 mm).

**ECLIP** can be installed with a light-weight anchor.

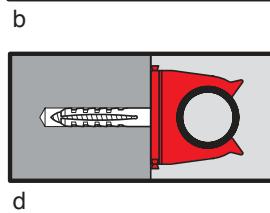

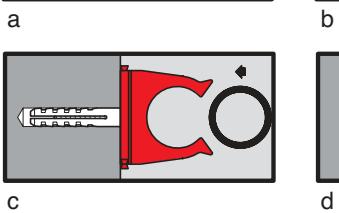

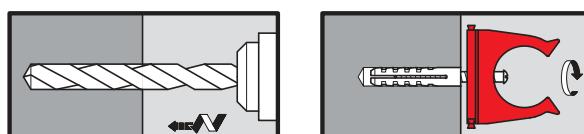

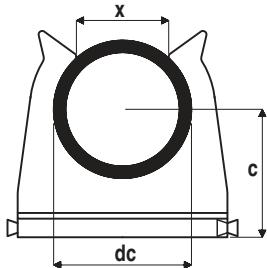

The characteristics are:

- Made of polypropylene colour grey RAL 7035.
- Flammability rating: UL 94-HB.
- A rounded shape to facilitate pipe accomodation.
- An elongated hole for adjusting wall fixings.
- A side hook for connecting other pipe clamps in series.
- A guide for laying in raceways.

**ECLIP** allows a fast, economic and precise fixing of plastic pipes in the electrical applications.

**ECLIP** is available in many diameters and packagings (box or industrial carton).

Type	Code	Pipe diameter			Width	Box	Carton	
		(mm)	dc/(mm)	x/(mm)

d

# EBAN

## EBAN

Metallic perforated banding for fixing PVC downpipes, parallel conducts and suspended installations.

EBAN is available in 3 widths, 2 thicknesses and in three different materials: zinc-plated steel, stainless steel and copper.

The banding has stamped holes that can be fixed with M4, M6, M8 thread or with an anchor.

Packed in box		Dimensions width x thickness	Ø Internal diameter	Ø Hole dimension	Q.ty roll
Type	Code	(mm)	(mm)	(mm)	mt
Zinc-plated steel	<b>8412001</b>	12 x 0,8	4,95	16	10

# ACCESSORIES FOR FIXING

## Applications

Bundle of cables.

Working temp.: -10°C÷85°C.  
Flammable rate: UL 94-V2.

## Characteristics

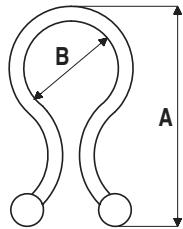

Material: polyamide 6.6 natural and black.  
(characteristics on page 19)

## Benefits

Easily releasable and reusable product.

### TWIST LOCK

Code	Code	A (mm)	B (mm)	Bag pcs	Carton pcs
Natural	Black				
1043105	1043106	22,9	5,1 - 7,6	1.000	25.000

1043113	1043114	34,5	13,5 - 16,0	1.000	10.000
1043115	1043116	39,4	17,8 - 20,3	1.000	6.000

## Applications

Adhesive cable clamps for round cables.

Working temp.: -40°C÷85°C.  
Flammable rate: UL 94-V2.

## Characteristics

Material: PA 6.6  
(characteristics on page 19)

Self adhesive bases with 2 different types of adhesive foam: rubber base, acrylic base.

**The rubber base adhesives:** are particularly suitable for immediate applications.

**The acrylic base adhesive:** is instead more suitable for long period applications and where a good UV ray resistance is required.

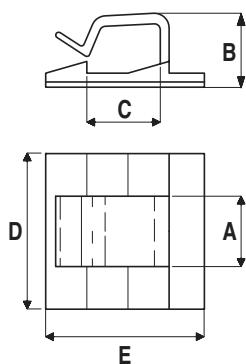

## Benefits

Safe mount of a round cable on the surface without a screw or bolt.

Easy and fast application thanks to the adhesive base.

### CABLE CLAMPS WITH RUBBER BASE ADHESIVE FOR ROUND CABLES

### Applications

Adhesive cable clamps for flat cables.

Working temp.: -10°C ÷ 70°C

Flammability rating: UL 94-V0.

### Characteristics

Material: PVC.

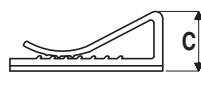

(characteristics on page 19)

Self adhesive bases with **rubber base adhesive**, that are particularly suitable for immediate applications.

### Benefits

Safe mount of a flat cable on the surface without a screw or bolt.

Easy and fast application thanks to the adhesive base.

**ADHESIVE FLAT RIBBON CABLE CLAMPS (PVC)**

## CRAMP WITH STEEL NAIL

### Applications

Cramp with steel nail for round and flat cable.

Working temp.: -40°C ÷ 100°C

Flammability rating: UL-94 HB.

### Characteristics

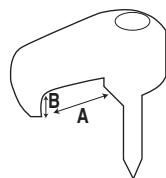

Material: HD Polyethylene with high thermic resistance. (characteristics on page 19).

Nail in hardened and galvanized steel.

### Benefits

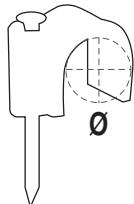

The nail in steel allows an easy and fast installation in all solid surfaces.

The practical rigid packaging allows the transport of the product without dispersion.

# CABLE PULLING DEVICE

## Characteristics:

Elematic Cabling Systems offers an extensive range of duct rods made by fibreglass, polyester and nylon (Perlon) materials. It has a range of accessories and spare parts which enables the electricians the widest choice for their requirements. The new range ELETWIST in twisted polyester is offered into lengths from 10 to 30 m (diameter 4,5 mm), extendable with the dedicated accessory, while the nylon products range complete the selection with lengths from 10 to 25 meters and a 4 mm diameter. The range of fibreglass rods, with practical winders, offers products of length from 20 to 200 m, with diameters from 3 to 11 mm; All our duct rods are equipped with interchangeable terminals and can be used with a wide range of accessories, including the appropriate repair kit (fibreglass probes) that provide an easy and economic solution to the problem, allowing the continued work on site without wasting time.

## HOW TO CHOOSE THE RIGHT DUCT ROD:

The main characteristics of the duct rods are their length and diameter.

FOR THE LENGTH: is recommended to choose a duct rod 3 to 5 meter longer than the duct in which you have to insert the cables.

FOR THE DIAMETER: it defines the pushing power and, at the same time, the maximum distance that can be reached in the duct.

Increasing the diameter size, the reachable distance rises, decreasing the turning radius curvature and enabling the easiest cable insertion. It means that it is very important to choose the right dimension, in order to get the maximum benefits of fibreglass material.

## ADVISED USE

**Applications**

- Civil installations.

**Characteristics**

- Fibreglass Ø 3 mm and length till 30 mt.
- Ideal for ducts with diameter till 32 mm.
- Excellent boost power.
- Min. radius curvature: 160 mm.
- Pulling resistance (with starting and ending terminals): 110 kg.
- Breaking strength: 400 kg.

**Advantages**

- Fast insertion.
- Easy wind up thanks to the practical pulling grip tool in shockproof material.
- Wide range of accessories (Plus version).
- Intherchangeable thacaded M5 terminals.

# CABLE QUICK SPARE PARTS

## SPARE-FIBREGLASS ROD - PULLING/PUSHING GRIP

13570008	6-9	210	M5	1

## SPECIAL GLUE for rods - CABLE LUBRICANTS

Code		Weight (ml)	Box pcs
13570010	Special glue (*)	3	2
13520000	Lubricant foam (**)	400	1
13520001	Lubricant gel (**)	500	1

(\*)• Acrylic glue (cyanoacrylate) for repaiging fibreglass duct rods.  
 • Light viscosity and high resistance.  
 • Colourless.  
 • Re-usable and reusable small bottle.

(\*\*)• Lubricant foam/gel, water base, for favouring the passage of wires and cables in the electrical ducting; it reduces of 80% the friction in inserting the duct rods and wires on pipes.  
 • The innovative formula avoids the glue effect, typical of many other products. After its fast evaporation, the component remains allowing the take off the wires even after a long period and a critical temperature as well.  
 • Working and stocking temperature: -10° C ÷ 50°.  
 • Chemical inert and non-toxic.

# FIBREGLASS DUCT RODS Ø 4,5 ÷ 11 mm with cage

## Applications

Tertiary and industrial installation.

## Characteristics

- Self energetic fibreglass Ø from 4,5 to 11 mm and length till 200 mt, complete with starting and ending terminals.
- High boost power.
- For more technical information, please see the table at page 47.

## Advantages

- Fast insertion.
- Easy to wind up and to transport, thanks to the galvanized steel cage with brake on the hub and handhold.
- Interchangeable threaded terminals.
- Wide range of accessories.

# NYLON DUCT RODS 4 mm

## Applications

- Tertiary and industrial installations.

## Characteristics

- Nylon Perlon with ø 4 mm and length till 25 mt.
- High flexibility.
- Pulling resistance (with starting and ending connections): 115 kg.
- For more technical information see the table at page 47.

## Avantages

- Efficiency and practical usage.
- Ideal for short duct section.
- Interchangeable threaded M4 terminals.

# ELETWIST - POLYESTER DUCT RODS Ø 4,5mm

## Applications

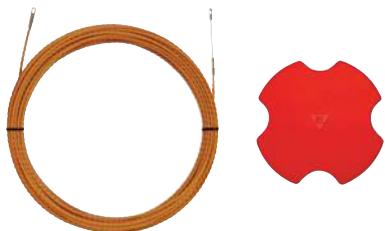

- Tertiary and industrial installations.

## Characteristics

- Duct rod made in twisted polyester Ø 4,5 from 10 to 30 meters, complete with starting and ending terminals;
- High boost power;
- Easy insertion;
- For more technical information, please see the table at page 47.

## Avantages

- Power and flexibility;
- Provided with a pulling grip to make easier the traction;
- Interchangeable threaded M5 terminals
- Possibility to join two rods with the coupling joint.
